

CULTURAL RESOURCES

Clients turn to our cultural resources specialists for assignments ranging from compliance issues to preservation planning. Our architectural historians and archaeologists bring each assignment close working relationships with state historic preservation offices and local preservation organizations. **We are working every day to support our clients** through governing regulations such as the National Environmental Policy Act (NEPA), Section 106 of the National Historic Preservation Act 1966, and Section 4(f) of the U.S. Department of Transportation Act. Our cultural resources specialists collaborate with planners, architects, and engineers to avoid and/or minimize adverse effects to historic properties and, when necessary, craft mitigation solutions that amenable to all parties.
