Clients turn to our cultural resources specialists for assignments ranging from compliance issues to preservation planning. Our architectural historians and archaeologists bring to each assignment close working relationships with state historic preservation offices and local preservation organizations.

From dense urban cores to rolling countrysides, our experts support clients in transportation, telecommunications, private land development, and federal, state, and municipal governments. Our services enable clients to become stewards of cultural heritage—while improving our infrastructure and communities for the future.

We are working every day to support our clients through governing regulations such as the National Environmental Policy Act (NEPA), Section 106 of the National Historic Preservation Act of 1966, and Section 4(f) of the U.S. Department of Transportation Act. Our cultural resources specialists collaborate with planners, architects, and engineers to avoid and/or minimize adverse effects to historic properties and, when necessary, craft mitigation solutions that are amenable to all parties.

**Our Services:**

- Historic research and documentation
- Historic property identification and mapping
- Archaeological surveys and investigations
- Archaeological monitoring during construction
- Artifact identification and analysis
- Agency coordination
- Section 106 analyses
- Section 4(f) evaluations
