

## Library Interiors

### Elgin Community College's Renner Academic Library, Elgin, IL

We designed the new library with student accessibility as the focus. Located at the heart of campus, the facility allows students to access resources, collaborate with fellow classmates, and socialize. Working closely with the college administrators, contractors, and vendors, we delivered the library five months ahead of schedule and \$2.3 million under budget.

## We are committed to our clients and meeting their missions.

Our interior designers work with clients to create inspiring spaces through collaboration. We design to meet our client's needs whether the project is a small-scale remodel, a large renovation, or new construction. We transform spaces with the use of color, texture, light, and furniture. A worn-out space can become an inspiring, innovative, refreshing, and functional place to be.

**Children's Program Room, Romeoville Branch Library, Romeoville, IL**

Having spaces that visually speak to the intended users make patrons feel welcome.

With national experience and expertise, our professional interior designers listen, engage, and collaborate with our clients to create functional and creative spaces. We understand that it is important for libraries to stay relevant within the community. They are more than “book warehouses” in our diverse and changing culture.

We know that integrating technology and flexibility is critical to the success of the space. With 45 years of experience designing libraries for communities nationwide, we've learned that your focus is creating an environment that engages library patrons. We involve your library staff, board, user groups, and community to better understand the needs within your community.

Let us put our community relationships and local understanding to work for you to achieve outstanding results.

**White Oak Library District Romeoville Branch, Romeoville, IL**

We designed a true community knowledge center by revitalizing an existing 47,000-SF, two-level building. We created a teen area (pictured), a place where “teens can be teens.” Durability and flexibility were critical factors.

**Glenview Public Library, Glenview, IL**

This 85,000-SF branch features a meeting room, a technology training lab, and a dedicated teen area. We designed an adult area (pictured) equipped with a fireplace where patrons can lounge and browse through materials like they're in the comfort of their own home.

## Our Services
