We listen. We integrate the vision with the requirements. Then we build consensus around innovative, vital, and practical designs.

Our national practice in the design of facilities for sports, recreation, and wellness ranges from community-based centers with a variety of amenities to dynamic student recreation centers that enliven campuses and boost multifaceted fitness programs.
“The Dewberry team has brought to the table a spirit of cooperation, practical ideas, and a team spirit...

In a relatively short period of time, it became quite clear that Dewberry’s experience in the programming of recreational facilities for higher education institutions is equal to none. The team assigned to our project knows how to listen, interpret and translate wishes and desires into practical and well-thought-out concepts.”

Zac Ovadia
Director, Facilities Planning
University of North Florida
“Mayo Clinic has the opportunity to provide a leadership role in promoting health and wellness on a broader scale.

This may be one of the most comprehensive wellness facilities in the country and could be a model that will be replicated in other locations.”

Dr. Kerry Olsen, M.D.
Chair of Design and Construction Committee

Colleges and Universities
- Innovative buildings that complement campus architecture and planning
- Dynamic interior spaces that support a wide range of programming
- Collaborative design approach

Medically Based Centers
- Aligned with a healthcare institution
- A well-defined cost model and business pro forma
- Designed to help the patron’s body regain its health, while also uplifting the mind and spirit

Community Centers
- Accommodating a mix of uses and programs in a compact space
- Minimizing energy costs and maintenance requirements through insights gained from experience
Dewberry® Services
