Sustainability is balancing long-term environmental, economic, and social goals through high-performance designs that emphasize ecology, mobility, resilience, research, and technology.

We are committed to delivering the highest possible sustainable outcome for our projects, using excellence in design, sustainability, and business as a guiding vision.

We are striving to adapt with our ever-changing world and offer our clients sustainable, cost-effective solutions for their goals and challenges.

Our reporting aligns with the Global Reporting Initiative to better understand our opportunities, inform our decision-making process, and communicate our environmental and social impact. This supports our community-based outreach and engagement, imparts our commitment to environmental stewardship, and enhances the process of gathering and checking data.
“We are excited to be able to leverage our bond fund dollars for capital improvements and free up general fund dollars by reducing energy costs. As a district we are always looking for ways to lower our utility costs, which in turn allows us to hire more teachers. With the help of Dewberry and our other consultants and partners, we were able to design a system that is very efficient and has a short return on investment time period.”

Charlie Bushyhead
Union Public Schools Assistant Superintendent for Support Services
Dewberry® Services

ARCHITECTURE
• Holistic sustainable conception
• High-performance building design
• LEED®, Green Globes, and 2030 Challenge certification
• Net-zero design services
• Sustainable Return on Investment (SROI) analysis

ENERGY SOLUTIONS
• ASHRAE-level energy audits
• Commissioning and retro-commissioning
• Renewable energy HVAC, lighting, and controls upgrades

Rueger-Hess Water Purification Facility—Nation’s First Use of Ceramic Membranes in Potable Treatment | Parker, CO
MEP
- Energy management systems
- High-performance building design
- Net-zero design services
- Technical energy modeling; ROI
- Renewable energy system design

SITE/CIVIL ENGINEERING
- DimensionalView® map-based data management
- Land planning, due diligence, and feasibility analyses
- Landscaping
- Site/neighborhood urban planning
- Utilities and stormwater management

TRANSPORTATION
- Alignment, material selection, resource efficiency, and green stormwater infrastructure
- Lifecycle cost
- Operations management
- Resilience planning/design

WATER
- Flood risk management
- Infrastructure renewal and pollution prevention
- Resilience planning/design
- Water conservation and reuse
Dewberry is a leading, market-facing firm with a proven history of providing professional services to a wide variety of public- and private-sector clients. Recognized for combining unsurpassed commitment to client service with deep subject matter expertise, Dewberry is dedicated to solving clients’ most complex challenges and transforming their communities. Established in 1956, Dewberry is headquartered in Fairfax, Virginia, with more than 50 locations and 2,000 professionals nationwide. To learn more, visit www.dewberry.com.
