Military & Federal Services
We work on projects of critical national importance for a diverse array of military and federal agencies.

Our engineers, architects, and planners are committed to developing innovative and sustainable solutions to our clients’ most challenging mission requirements.

Key focus areas:
- Energy solutions
- GIS
- Sustainment, restoration, and modernization
- Civil works
- Intelligence Community
- Veterans Affairs
- Facility asset management

Representative Client and Project Locations
Our Team

We provide architectural, engineering, master planning, and asset management services for CONUS and OCONUS infrastructure and facilities that are built, maintained, and managed for the U.S. Department of Defense, U.S. Coast Guard, U.S. Department of Veterans Affairs, and the national Intelligence Community. We have been a trusted advisor for more than 60 years.

Fort Belvoir Community Hospital Complex

We provided critical multi-discipline engineering expertise for the new $930-million complex. Our work was essential to accommodating the transition of healthcare services from Walter Reed Army Medical Center in Washington, D.C. The project includes a 27,100-SF central utility plant, a new one MGD sewage pump station, 3,000-LF of sanitary sewer force main pipe, and a mile of water main.

Fort Bragg Training Support Center

For this $14-million, 117,177-SF center and 4,000-SF hazardous storage shed, we used Bentley BIM to trouble-shoot interferences between the pre-engineered metal building frame and other building components, significantly reducing the number of change orders during construction and saving USACE valuable MILCON dollars. The facility is LEED-Gold Certified.

White Sands Missile Range Mapping Project

We provided digital aerial imagery supplemented with airborne GPS to produce orthophotography, oblique images, and mosaic tiles for White Sands Missile Range. The range needed to refresh baseline digital aerial imagery over the approximate 4,144-SM area for land development, encroachment, unit training, and installation planning.

Fort Hamilton Armed Forces Reserve Center (AFRC), NY

We were the lead designer for the design-build of 123,000-SF AFRC, 3,500-SF maintenance training building, three storage sheds, truck wash, loading ramp, four parking lots totaling 280 spaces, and all associated site work. The design exceeds LEED Silver energy savings by 30% and meets all AT/FP requirements.

Fort Bragg Conference and Catering Center, NC

For the one-story, 49,280-SF Fort Bragg Conference and Catering Center, we provided architecture and engineering design services as a part of a design-build team with Centennial Contractors Inc. The center’s main function is to support the growing requirements for meetings, conferences, social events, and recreational needs of Fort Bragg military personnel and their families.
Our Services
- Architecture & building engineering
- Secure facilities for the Intelligence Community
- Healthcare & wellness
- Public safety facilities
- Justice, corrections, & courts
- Engineering
- Site/civil & transportation
- Energy solutions
- Utilities & infrastructure
- Life cycle services
- Consulting
- Water resources planning
- Surveying, mapping, & GIS
- Emergency management & disaster mitigation
- Facility asset management

Representative Clients

USACE
- Baltimore, Fort Worth, Huntsville Center, Jacksonville, Mobile, New York, Norfolk, Omaha, Philadelphia, Sacramento, Savannah, St. Louis, & Wilmington Districts

NAVFAC
- Mid-Atlantic (including MCAS Cherry Point)
- Washington (including the U.S. Naval Academy)

USAF
- Seymour Johnson AFB
- Hanscom AFB
- MacDill AFB
- March AFB

Veterans Affairs
- VISNs
