At Dewberry, we are supporting the electric vehicle revolution by providing program management, planning, engineering design, permitting, and construction oversight to deploy charging stations in the eastern U.S.

We have been involved with more than 100 charging stations at raw land sites, existing parking lots, and parking garages. Specific services include preliminary site audits, Phase I environmental site assessments, utility coordination, electrical engineering design, including utility route design, AC and DC power design, civil/site design, and site regulatory permitting. Our clients include property owners, vehicle manufacturers, Volta Charging, EVgo, and NJ TRANSIT.

Successful projects typically start with a strong knowledge of local conditions—including a region’s physical, political, regulatory, economic, and demographic factors. Our network of community-based offices enables our clients to benefit from our local experience and presence, as well as our familiarity with zoning issues, plan development and review processes, local codes, and ordinances.

**Services**

- Asset management
- Construction engineering and inspection
- Construction
- Electrical engineering
- Environmental services/permitting
- Expert testimony
- Facilities/buildings engineering
- Geotechnical engineering
- GIS
- Mechanical engineering
- Planning, including renderings and photo simulations
- Plumbing and fire protection engineering
- Program management
- Resilience consulting
- Site acquisition consulting
- Site/civil engineering
- Structural engineering
- Surveying and mapping
- Sustainability consulting
- Transit/transportation planning
- Traffic engineering

**About Dewberry**

For more than 60 years, we have been a leader in providing planning, engineering, architecture, program management, surveying, and mapping services, along with a myriad of technical support. With more than 50 locations, our more than 2,000 professionals work collaboratively with public- and private-sector clients, including government agencies, the military community, municipalities and their authorities, institutions, developers, and corporations.

A privately held firm, Dewberry was established as a land design and surveying practice in 1956 in Virginia. Today, we are an *Engineering News-Record* “Top 50” design firm, and rank in the top 25 in many of its market categories.
