GENERAL SERVICES ADMINISTRATION

Federal Supply Service *Authorized Federal Supply Schedule Price List*

On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order is available through **GSA Advantage!**[™], a menu-driven database system. The INTERNET address for **GSA Advantage!**[™] is: <http://www.GSAAdvantage.gov>.

Federal Supply Group: Professional Services

Contract Number: GS00F280CA

Contract Period: 27 Aug 2015 – 26 Aug 2025

Contractor Name: **Dewberry Engineers Inc.**
Contractor Address: 8401 Arlington Boulevard, Fairfax, VA 22031-4666
Phone: 703.849.0100
Website: www.dewberry.com

Contract Administration: **Howard Perlmutter**
703.208.6872 (ph)
703.849.0106 (fax)
hperlmutter@dewberry.com

Business Size: Large

For more information on ordering from Federal Supply Schedules go to the GSA Schedules page at GSA.gov.

Price list current as of: Modification # PS-0037 effective November 16, 2022

CUSTOMER INFORMATION:

1a. Table of Awarded Special Item Number(s) with appropriate cross-reference to page numbers:

SIN	SIN Description
541611	Management and Financial Consulting, Acquisition and Grants Management Support, and Business Program and Project Management Services
541620	Environmental Consulting Services
541370GEO	Earth Observation Solutions
541370GIS	Geographic Information Systems (GIS) Services
OLM	Order Level Material (OLM)

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply. See Price List

1c. If the Contractor is proposing hourly rates a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate "Not applicable" for this item. See Labor Category Descriptions

2. Maximum Order: \$1,000,000.00

3. Minimum Order: \$100.00

4. Geographic Coverage (delivery Area): Worldwide

5. Point(s) of production (city, county, and state or foreign country): Same as company address

6. Discount from list prices or statement of net price: Government net prices (discounts already deducted). See Attachment.

7. Quantity discounts: None offered

8. Prompt payment terms: Net 30 days. Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.

9. Foreign items (list items by country of origin): N/A

10a. Time of Delivery (Contractor insert number of days): Contact Contractor or To Be Determined at the Task Order level

10b. Expedited Delivery. Contact Contractor or To Be Determined at the Task Order level

10c. Overnight and 2-day delivery. Contact Contractor or To Be Determined at the Task Order level

10d. Urgent Requirements. Contact Contractor or To Be Determined at the Task Order level

11. F.O.B Points(s): Destination

12a. Ordering Address(es): Same as Contractor

12b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA's) are found in Federal Acquisition Regulation (FAR) 8.405-3.

13. Payment address(es): Same as company address

14. Warranty provision: Contractor's standard commercial warranty.

15. Export Packing Charges (if applicable): To be determined at the Task Order level.

16. Terms and conditions of rental, maintenance, and repair (if applicable): N/A

17. Terms and conditions of installation (if applicable): N/A

18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from listprices (if applicable): N/A

18b. Terms and conditions for any other services (if applicable): N/A

19. List of service and distribution points (if applicable): N/A

20. List of participating dealers (if applicable): N/A

21. Preventive maintenance (if applicable): N/A

22a. Environmental attributes, e.g., recycled content, energy efficiency, and/or reduced pollutants: N/A

22b. Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services. The EIT standards can be found at: www.Section508.gov/. N/A

23. Unique Entity Identifier (UEI) Number: K3WDSCEDY1V5

24. Notification regarding registration in System for Award Management (SAM) database:
Contractor registered and active in SAM

Service Contract Labor Standards (SCLS) Matrix

SCLS Eligible Labor Category	SCLS Equivalent Code Title	Wage Determination No
Graphic Artist	15080 – Graphic Artist	2015-4282
Word Processor	01613 – Word Processor III	2015-4282
Administrative Assistant	01020 -Administrative Assistant	2015-4282
Graphic Designer	30062-Drafter/CAD Operator	2015-4282
UAS Pilot	15070 - Flight Instructor (Pilot)	2015-4281
Ariel Pilot	15030-Air Crew Training Devices Instructor (Pilot)	2015-4281

The Service Contract Labor Standards (SCLS) is applicable to this contract and it includes SCLS applicable labor categories. The prices for the indicated (**) SCLS labor categories are based on the U.S. Department of Labor Wage Determination Number(s) identified in the SCLS matrix. The prices awarded are in line with the geographic scope of the contract (i.e. nationwide).

Labor Category Descriptions:

Detailed labor category descriptions are shown on the following pages.

SIN 541611

Administrative Assistant (SIN 541611)

Responsibilities. Types, proofreads materials for reports, manuals, briefs, instruction materials, catalogs, training materials, and other documents and publications, using established quality standards.

Education and Experience. High school diploma and at least four years' experience creating, maintaining, and updating documents, reports, and correspondence using PowerPoint, Excel, MS Word, and the Internet.

Business Process Engineer I (SIN 541611)

Responsibilities. Applies process improvement and reengineering methodologies and principles to conduct process modernization projects. Responsible for effective transitioning of existing project teams and the facilitation of project teams in the accomplishment of project activities and objectives. Provides group facilitation, interviewing, training, and provides additional forms of knowledge transfer. Coordinates between multiple project teams to ensure enterprise-wide integration of reengineering efforts. Includes activity and data modeling, developing modern business methods, identifying best practices, and creating and assessing performance measurements.

Education and Experience. A bachelor's degree in Computer Science, Information Systems, Engineering, Business, Education, Management Sciences, Human Resources or other related discipline and at least three years' specialized experience. Specialized experience may include facilitation, training, methodology development and evaluation, process reengineering across all phases, identifying best practices, change management, business process improvement, business management techniques, organizational development, activity and data modeling, or information system development methods.

Business Process Engineer II (SIN 541611)

Responsibilities. Applies process improvement and reengineering methodologies and principles to conduct process modernization projects. Responsible for effective transitioning of existing project teams and the facilitation of project teams in the accomplishment of project activities and objectives. Provides group facilitation, interviewing, training, and provides additional forms of knowledge transfer. Coordinates between multiple project teams to ensure enterprise-wide integration of reengineering efforts. Includes activity and data modeling, developing modern business

methods, identifying best practices, and creating and assessing performance measurements.

Education and Experience. A bachelor's degree in Computer Science, Information Systems, Engineering, Business, Education, Management Sciences, Human Resources or other related discipline and at least four years' specialized experience. Specialized experience may include facilitation, training, methodology development and evaluation, process reengineering across all phases, identifying best practices, change management, business process improvement, business management techniques, organizational development, activity and data modeling, or information system development methods.

Business Process Engineer III (SIN 541611)

Responsibilities. Applies process improvement and reengineering methodologies and principles to conduct process modernization projects. Responsible for effective transitioning of existing project teams and the facilitation of project teams in the accomplishment of project activities and objectives. Provides group facilitation, interviewing, training, and provides additional forms of knowledge transfer. Coordinates between multiple project teams to ensure enterprise-wide integration of reengineering efforts. Includes activity and data modeling, developing modern business methods, identifying best practices, and creating and assessing performance measurements.

Education and Experience. A master's degree in Computer Science, Information Systems, Engineering, Business, Education, Management Sciences, Human Resources or other related discipline and at least six years' specialized experience. Specialized experience may include facilitation, training, methodology development and evaluation, process reengineering across all phases, identifying best practices, change management, business process improvement, business management techniques, organizational development, activity and data modeling, or information system development methods.

Senior Consultant I (SIN 541611)

Responsibilities. Senior technical staff member who manages multiple projects. Provides specialized technical or functional expertise and task order management. Supplies expertise in the areas of business management, environmental management, emergency management, security and homeland defense, strategic and tactical planning, personnel training and development, transportation planning, facilities

planning, emergency/disaster management and planning, surveying, cost/benefit analyses, process improvement, risk mitigation, or facilitation. Operates with wide latitude for independent action.

Education and Experience. Must possess a graduate degree or equivalent and have a minimum of six years' specialized experience, or 12 years' specialized experience with a bachelor's degree.

Consultant I (SIN 541611)

Responsibilities. Uses a wide application of principles, theories, concepts, and techniques to develop innovative solutions to problems. Leads concept development, system design and simulation, and modeling functions to support life-cycle engineering and program activities. Applies expert knowledge to gather facts, research and analyze data, and develop conclusions and recommendations.

Education and Experience. A bachelor's degree or equivalent and six years' specialized experience. Specialized expertise must be in a technical or functional discipline, sub-discipline, and/or technology involving definition and interpretation of performance requirements and measurements. Experienced in decision-making and managing multiple programs/projects simultaneously. May have authored and published articles and books in their field of expertise.

Consultant II (SIN 541611)

Responsibilities. Uses a wide application of principles, theories, concepts, and techniques to develop innovative solutions to problems. Leads concept development, system design and simulation, and modeling functions to support life-cycle engineering and program activities. Applies expert knowledge to gather facts, research and analyze data, and develop conclusions and recommendations.

Education and Experience. A bachelor's degree or equivalent and eight years' specialized experience. Specialized expertise must be in a technical or functional discipline, sub-discipline, and/or technology involving definition and interpretation of performance requirements and measurements. Experienced in decision-making and managing multiple programs/projects simultaneously. May have authored and published articles and books in their field of expertise.

Consultant III (SIN 541611)

Responsibilities. Uses a wide application of principles, theories, concepts, and

techniques to develop innovation solutions to problems. Leads concept development, system design and simulation, and modeling functions to support life-cycle engineering and program activities. Applies expert knowledge to gather facts, research and analyze data, and develop conclusions and recommendations.

Education and Experience. A master's degree or equivalent and 10 years' specialized experience or 16 years' specialized experience with a bachelor's degree. Possesses specialized expertise in a technical or functional discipline, sub-discipline, and/or technology involving definition and interpretation of performance requirements and measurements. Experienced in decision-making and managing multiple programs/projects simultaneously. May have authored and published articles and books in their field of expertise.

Data Base Management Specialist I (SIN 541611)

Responsibilities. Provides highly technical expertise in the use of DBMS. Evaluates and recommends available DBMS products to support validated user requirements. Defines file organization, indexing methods, and security procedures for specific user applications.

Education and Experience. A bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related discipline and at least four years' specialized experience. Specialized experience includes demonstrated experience using current DBMS technologies, application design utilizing various DBMS, and experience with DBMS internals.

Data Base Management Specialist II (SIN 541611)

Responsibilities. Manages the development of data base projects. Plans and budgets staff and data base resources. When necessary, reallocates resources to maximize benefits. Prepares and delivers presentations on data base management systems (DBMS) concepts. Provides daily supervision and direction to support staff.

Education and Experience. A bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related discipline and eight years' specialized experience. Specialized experience includes demonstrated experience with DBMS design and system analysis, current operating systems software internals, and data manipulation languages.

Functional Analyst II (SIN 541611)

Responsibilities. Analyzes user needs to determine functional and cross-functional requirements. Performs functional allocation to identify required tasks and their interrelationships. Identifies resources required for each task.

Education and Experience. A bachelor's degree and at least three years' specialized experience. Specialized experience includes developing functional requirements for complex integrated systems, programs, and projects. Must demonstrate the ability to work independently or under only general direction.

Functional Analyst III (SIN 541611)

Responsibilities. Analyzes user needs to determine functional and cross-functional requirements. Performs functional allocation to identify required tasks and their interrelationships. Identifies resources required for each task. Provides daily supervision and direction to support staff.

Education and Experience. A bachelor's degree in Computer Science and at least eight years' specialized experience. Specialized experience includes superior functional knowledge of task order specific requirements, or developing functional requirements for complex integrated systems, programs and projects. Must demonstrate the ability to work independently or under only general direction.

Graphic Designer (SIN 541611)

Responsibilities. Prepares sketches, artwork, line drawings, flowcharts, and other visual illustrations in support of technical documents and presentations. Skilled in the use of standard personal computer/desktop graphic applications such as MS PowerPoint, Corel Presentations, Corel Draw, and/or Adobe Illustrator. Produces camera-ready copy for incorporation into manuals, technical documents, and slide show or viewgraph presentations.

Education and Experience. Must have an associate degree in a technical field (e.g., Mathematics, Computer Science, Electronics, or Engineering). A minimum of three years' experience in creating the aforementioned products is required.

IT Professional I (SIN 541611)

Responsibilities. Assists in establishing the information requirements for the development of enterprise-wide or large-scale information systems. Assists in designing system architecture to include the software, hardware, and communications needed to

support the total requirements as well as provide for present and future cross-functional requirements and interfaces. Ensures the system is compatible and in compliance with the information technology standards of the requesting organization as they apply to the implementation and specification of the IT solution proposed. Evaluates analytically and systematically problems of workflows, organization, planning, and develops appropriate corrective action.

Education and Experience. A bachelor's degree in Computer Science, Information Systems, Software Engineering, or other discipline related to Systems Engineering and Software Engineering and at least four years' specialized experience. Specialized experience includes use of system design methodologies and design tools such as UML, entity relationship diagrams, and other design techniques.

IT Professional II (SIN 541611)

Responsibilities. Establishes the information requirements for the development of enterprise-wide or large-scale information systems. Designs system architecture to include the software, hardware, and communications needed to support the total requirements as well as provide for present and future cross-functional requirements and interfaces. Ensures the system is compatible and in compliance with the information technology standards of the requesting organization as they apply to the implementation and specification of the IT solution proposed. Evaluates analytically and systematically problems of workflows, organization, planning, and develops appropriate corrective action.

Education and Experience. A bachelor's degree in Computer Science, Information Systems, Software Engineering, or other discipline related to Systems Engineering and Software Engineering and at least six years' specialized experience. Specialized experience includes use of system design methodologies and design tools such as UML, entity relationship diagrams, and other design techniques.

IT Professional III (SIN 541611)

Responsibilities. Establishes the information requirements for the development of enterprise-wide or large-scale information systems. Designs system architecture to include the software, hardware, and communications needed to support the total requirements as well as provide for present and future cross-functional requirements and interfaces. Ensures the system is compatible and in compliance with the information technology standards of the requesting organization as they apply to the implementation and specification of the IT solution proposed. Evaluates analytically

and systematically problems of workflows, organization, planning, and develops appropriate corrective action.

Education and Experience. A master's degree in Computer Science, Information Systems, Software Engineering, or other discipline related to Systems Engineering and Software Engineering and at least five years' specialized experience. Specialized experience includes use of system design methodologies and design tools such as UML, entity relationship diagrams, and other design techniques.

Principal Consultant (SIN 541611)

Responsibilities. Uses a wide application of principles, theories, concepts, and techniques to develop innovative solutions to problems. Leads concept development, system design, simulation and modeling functions to support life-cycle engineering and program activities. Applies expert knowledge to gather facts, research and analyze the data, and develop conclusions and recommendations. Provides specialized expertise and oversight on projects and programs and supplies technical advice and counsel to other professionals. Operates with wide latitude for independent action. Possesses expertise in the areas of business management, environmental management, emergency management, security and homeland defense, strategic and tactical planning, personnel training and development, transportation planning, facilities planning, emergency/disaster management and planning, surveying, facilitation, cost/benefit analyses, process improvement, or risk mitigation.

Experience and Education. Must possess a graduate degree or equivalent with 15 years' specialized experience or have a minimum of 18 years' specialized experience with a bachelor's degree. Possesses a high-level of specialized expertise in a technical or functional discipline, sub-discipline, and/or technology involving definition and interpretation of performance requirements and measurements. Experienced in decision-making and managing multiple programs/projects simultaneously.

Program Manager (SIN 541611)

Responsibilities. Directs, coordinates, and exercises supervisory authority for planning, organizing, controlling, integrating, and completing programs. Develops and establishes procedures and guidelines for daily operation of assigned program. Executes and implements program directives and develops systems and controls to carry out program tasks. Determines work schedules, sets priorities, and implements procedures for performing work activities. Directs and monitors work results for meeting customer requirements, specifications, and quality assurance standards. Evaluates performance

of assigned program tasks in terms of quality, cost control, and program schedules.

Education and Experience. A bachelor's degree or equivalent and 10 years' specialized experience in general program management. Specialized experience must be in a technical or functional discipline and must have involved management of multiple programs simultaneously.

Project Manager I (SIN 541611)

Responsibilities. Directs, coordinates, and exercises supervisory authority for planning, organizing, controlling, integrating, and completing programs. Develops and establishes procedures and guidelines for daily operation of assigned program. Executes and implements program directives and develops complex systems and controls to carry out program tasks. Determines work schedules, sets priorities and implements procedures for performing work activities. Directs and monitors work results for meeting customer requirements, specifications, and quality assurance standards. Evaluates performance of assigned program tasks in terms of quality, cost control, and program schedules.

Education and Experience. A bachelor's degree or equivalent and five years' experience in general program management. Specialized experience must be in a technical or functional discipline and must have involved management of multiple projects simultaneously.

Project Manager II (SIN 541611)

Responsibilities. Directs, coordinates, and exercises supervisory authority for planning, organizing, controlling, integrating, and completing programs. Develops and establishes procedures and guidelines for daily operation of assigned program. Executes and implements program directives and develops complex systems and controls to carry out program tasks. Determines work schedules, sets priorities and implements procedures for performing work activities. Directs and monitors work results for meeting customer requirements, specifications, and quality assurance standards. Evaluates performance of assigned program tasks in terms of quality, cost control, and program schedules.

Education and Experience. A bachelor's degree or equivalent and eight years' experience in general program management. Specialized experience must be in a technical or functional discipline and must have involved management of multiple projects simultaneously.

Quality Assurance Analyst (SIN 541611)

Responsibilities. Provides technical and administrative direction for personnel performing project development tasks, including the review of work products for correctness, adherence to the design concept and to user standards, review of program documentation to assure government/client standards and requirements are adhered, and for progress in accordance with schedules. Coordinates with the Project Manager and/or Quality Assurance Manager to ensure problem solution and user satisfaction. Makes recommendations, if needed, for approval of major systems installations. Prepares milestone status reports and deliveries/presentations on the system concept to colleagues, subordinates, and end-user representatives.

Education and Experience. A bachelor's degree and a minimum of three years' specialized experience. Specialized experience includes work in TQM systems, ISO 9001:2000, Personal Software Processes (PSP) auditing, integrated program management, and SPS processes. Proven understanding and application of government and ISO 9001:2000 documentation standards. Proven ability to work independently or under only general direction on complex application problems involving all phases of systems analysis is required.

Senior Consultant I (SIN 541611)

Responsibilities. Senior technical staff member who manages multiple projects. Provides specialized technical or functional expertise and task order management. Supplies expertise in the areas of business management, environmental management, emergency management, security and homeland defense, strategic and tactical planning, personnel training and development, transportation planning, facilities planning, emergency/disaster management and planning, surveying, cost/benefit analyses, process improvement, risk mitigation, or facilitation. Operates with wide latitude for independent action.

Education and Experience. Must possess a graduate degree or equivalent and have a minimum of six years' specialized experience, or 12 years' specialized experience with a bachelor's degree.

Senior Consultant II (SIN 541611)

Responsibilities. Senior staff member who manages multiple projects. Uses a wide application of principles, theories, concepts, and techniques to develop innovation solutions to problems. Leads concept development, system design, and simulation modeling functions to support life cycle engineering and program activities. Applies

expert knowledge to gather facts, research and analyze data, and develop conclusions and recommendations. Provides specialized expertise and oversees the staffing, scoping, budgeting, and scheduling of task orders. Supplies expertise in the areas of business management, environmental management, emergency management, security and homeland defense, strategic and tactical planning, personnel training and development, transportation planning, facilities planning, emergency/disaster management and planning, surveying, cost/benefit analyses, process improvement, risk mitigation, or facilitation. Operates with wide latitude for independent action.

Education and Experience. Must possess a graduate degree or equivalent with 10 years' specialized experience or have a minimum of 14 years' specialized experience with a bachelor's degree. Possesses a high-level of specialized experience in a technical or functional discipline, sub-discipline, and/or technology involving definition and interpretation of performance requirements and measurements. Experienced in decision-making and managing multiple programs/projects simultaneously. May have authored or published books or articles in field of expertise.

Senior Consultant III (SIN 541611)

Responsibilities. Senior manager responsible for multiple projects that involve different organizational and functional entities. Directs multiple projects, overseeing costs and administration, managing QC/QA review, and overseeing resource allocations and assignments. Uses a wide application of principles, theories, concepts, and techniques to develop innovative solutions to problems. Leads concept development, system design, simulation and modeling functions to support life-cycle engineering and program activities. Applies expert knowledge to gather facts, research and analyze the data, and develop conclusions and recommendations. Provides specialized expertise and oversight on projects and programs. Supplies advice and counsel to other professionals and operates with wide latitude for independent action. Possesses expertise in the areas of business management, environmental management, emergency management, security and homeland defense, strategic and tactical planning, personnel training and development, transportation planning, facilities planning, emergency/disaster management and planning, surveying, cost/benefit analyses, process improvement, risk mitigation and facilitation. Operates with wide latitude for independent action.

Education and Experience. Must possess a graduate degree or equivalent with 12 years' specialized experience or have a have a minimum of 15 years' specialized experience with a bachelor's degree. Possesses a high-level of specialized expertise in a

technical or functional discipline, sub-discipline, and/or technology involving definition and interpretation of performance requirements and measurements. Experienced in decision-making and managing multiple programs/projects simultaneously.

Senior Training Specialist (SIN 541611)

Responsibilities. Conducts the research necessary to develop and revise training courses and prepares appropriate training catalogs. Develops all instructor materials (course outline, background material, and training aids). Develops all student materials (course manuals, workbooks, handouts, completion certificates, and course critique forms). Trains personnel by conducting formal classroom courses, workshops, seminars, and/or computer-based/computer aided training. Provides daily supervision and direction to staff.

Education and Experience. A bachelor's degree and a minimum of five years' specialized experience. Specialized experience includes experience in developing and providing technical and end-user training. Demonstrated ability to communicate orally and in writing. Demonstrated ability to work independently or under only general direction.

Subject Matter Expert I (SIN 541611)

Responsibilities. Performs analytical and subject matter work in support of Client and project objectives. Uses a wide range of principles, theories, concepts, and techniques to develop innovative solutions to problems. Provides expert advice, assistance, or guidance in support of programs and projects. Applies expert knowledge to gather facts, research and analyze data, and develop conclusions and recommendations.

Education and Experience. A master's degree or equivalent and seven years' specialized experience in the applicable subject area.

Subject Matter Expert II (SIN 541611)

Responsibilities. Performs complex analytical and subject matter work in support of Client and project objectives. Uses a wide range of principles, theories, concepts, and techniques to develop innovative solutions to problems. Provides expert advice, assistance, or guidance in support of programs and projects. Applies expert knowledge to gather facts, research and analyze data, and develop conclusions and recommendations.

Education and Experience. A master's degree or equivalent and nine years' specialized

experience in the applicable subject area.

Subject Matter Expert III (SIN 541611)

Responsibilities. Performs highly complex analytical and subject matter work in support of Client and project objectives. Uses a wide range of principles, theories, concepts, and techniques to develop innovative solutions to problems. Provides expert advice, assistance, or guidance in support of programs and projects. Applies expert knowledge to gather facts, research and analyze data, and develop conclusions and recommendations. Expert in one of the following areas: strategic planning, cost/benefit analyses, process improvement, and risk mitigation. May have authorized or published articles or books in field of expertise.

Education and Experience. A master's degree or equivalent and 12 years' specialized experience in the applicable subject area.

Subject Matter Expert IV (SIN 541611)

Responsibilities. Performs highly complex analytical and subject matter work in support of Client and project objectives. Uses a wide range of principles, theories, concepts, and techniques to develop innovative solutions to problems. Provides expert advice, assistance, or guidance in support of programs and projects. Applies expert knowledge to gather facts, research and analyze data, and develop conclusions and recommendations. Expert in one of the following areas: strategic planning, cost/benefit analyses, process improvement, and risk mitigation. May have authorized or published articles or books in field of expertise.

Education and Experience. A master's degree or equivalent and 12 years' specialized experience in the applicable subject area.

Writer/Editor (SIN 541611)

Responsibilities. Develops and edits materials for reports, manuals, briefs, instruction materials, catalogs, training material, and other publications. Reviews journals, reports, and similar material to become familiar with product or process terminology.

Education and Experience. A bachelor's degree and at least six years' experience writing and editing for technical disciplines.

SIN 541620

Arborist (SIN 541620)

Responsibilities. Survey areas to be worked on to suggest best way to achieve objectives (e.g., pruning, planting, pest control and tree removal) according to type of trees and location of work to best fit the needs of the client. Provide written estimates and suggested solutions to client. Implement agreed work and inspect for compliance.

Education and Experience. ISA-Certified Arborist certificate. Three years' field experience in commercial and government sectors.

Archaeologist I (SIN 541620)

Responsibilities. Responsibilities. Under the general supervision of the Field Supervisor or Project Manager, performs field tasks including, survey, excavation, data recovery, monitoring, and testing, while working with crew members. Participates in data analysis and assists in writing project reports. Conducts surveys and locates sites using topographic maps, compass, and aerial photographs. Completes or assigns completion of site forms and Archaeological Reconnaissance Reports (AARFs) and maps. Performs site file searches using museum, university, and federal and state records. Contributes to report writing and production as needed.

Participates in data analysis and assists in writing project reports. Conducts surveys and locates sites using topographic maps, compass, and aerial photographs. Completes or assigns completion of site forms and Archaeological Reconnaissance Reports (AARFs) and maps. Performs site file searches using museum, university, and federal and state records. Contributes to report writing and production as needed.

Education and Experience. A bachelor's degree in Archaeology, Anthropology, or related field. One year project related experience.

Archaeologist II (SIN 541620)

Responsibilities. Under the general supervision of the Field Supervisor or Project Manager, performs field tasks including, survey, excavation, data recovery, monitoring, and testing, while working with crew members.

Participates in data analysis and assists in writing project reports. Conducts surveys and locates sites using topographic maps, compass, and aerial photographs. Completes or assigns completion of site forms and Archaeological Reconnaissance Reports (AARFs)

and maps. Performs site file searches using museum, university, and federal and state records. Contributes to report writing and production as needed.

Education and Experience. A bachelor's degree in Archaeology, Anthropology or related field. Two years' project related experience.

Archaeologist III (SIN 541620)

Responsibilities. Performs field tasks including, survey, excavation, data recovery, monitoring, and testing, while working with crew members. Participates in data analysis and assists in writing project reports. Conducts surveys and locates sites using topographic maps, compass, and aerial photographs. Completes or assigns completion of site forms and Archaeological Reconnaissance Reports (AARFs) and maps. Performs site file searches using museum, university, and federal and state records. Contributes to report writing and production as needed.

Education and Experience. A bachelor's degree in Archaeology, Anthropology or related field. Four years' specialized experience in archaeology.

Architect I (SIN 541620)

Responsibilities. Advises in the design, erection, and alteration of buildings and structures for the purpose of assisting in addressing environmental issues and initiatives. Reviews plans, specifications and methodologies. Assignments may involve use of the latest technologies and approaches in design and Architecture. Consults with Stakeholders to determine functional requirements of a project and the objectives of green and other environmental initiatives.

Education and Experience. A bachelor's degree in Architecture and two years' experience.

Architect II (SIN 541620)

Responsibilities. Advises in the design, erection, and alteration of buildings and structures for the purpose of assisting in addressing environmental issues and initiatives. Reviews plans, specifications and methodologies. Assignments may involve use of the latest technologies and approaches in design and Architecture. Consults with Stakeholders to determine functional requirements of a project and the objectives of green and other environmental initiatives.

Education and Experience. A bachelor's degree in Architecture and four years' experience.

Architect III (SIN 541620)

Responsibilities. Advises in the design, erection, and alteration of buildings and structures for the purpose of assisting in addressing environmental issues and initiatives. Reviews plans, specifications and methodologies. Assignments may involve use of the latest technologies and approaches in design and Architecture. Consults with Stakeholders to determine functional requirements of a project and the objectives of green and other environmental Initiatives.

Education and Experience. A bachelor's degree in Architecture and six years' experience.

Architectural Historian (SIN 541620)

Responsibilities. Project-level supervision. Responsibilities include conducting background research, survey and excavation fieldwork, and laboratory analysis; and writing reports. Work involves determinations of National Register eligibility, evaluation of impacts, and design of mitigation measures.

Education and Experience. A bachelor's or master's degree and experience in CRM involving Section 106 compliance projects, to meet federal and state agency permitting requirements as a Field Director. Experience identifying late nineteenth and early twentieth-century artifacts, preparing architectural descriptions, conducting historical research, and conducting research on artifacts, manufacturers, and technology. Proficiency in identifying, recording, and evaluating archaeological sites.

Biologist I (SIN 541620)

Responsibilities. Studies the basic principles of plant and animal life and the effects of varying environmental and physical conditions such as radioactivity or pollution. Studies reactions of plants, animals, and marine species to parasites, bacteria, pharmaceuticals and chemicals.

Education and Experience. A bachelor's degree in biology or a related science. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not typically

require exercising independent judgment.

Biologist II (SIN 541620)

Responsibilities. Studies the advanced principles of plant and animal life and the effects of varying environmental and physical conditions such as radioactivity or pollution. Studies reactions of plants, animals, and marine species to parasites, bacteria.

Education and Experience. A bachelor's degree in Biology or a related science. Two years' experience in the field or in a related area. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision. A certain degree of creativity and latitude is required.

Biologist III (SIN 541620)

Responsibilities. Studies the basic principles of plant and animal life and the effects of varying environmental and physical conditions such as radioactivity or pollution. Studies reactions of plants, animals, and marine species to parasites, bacteria, pharmaceuticals and chemicals.

Education and Experience. A master's degree in Biology or a related science. Four years' experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. A wide degree of creativity and latitude is expected. Typically reports to a supervisor or manager.

CADD/Graphics, Drafter (SIN 541620)

Responsibilities. Work with design team in support of designs, studies and analyses.

Education and Experience. High school diploma or equivalent. 2-3 years' experience in related field.

CADD Operator (SIN 541620)

Responsibilities. Determines design criteria, drawing sequence and presentation, sizing various system components and refining rough sketches and notes to include material quantities and equipment specifications obtained from standard calculations and vendor catalogues. Technical adequacy of non-routine work is reviewed by supervisor during progress and completion.

Education and Experience. High school diploma or equivalent. 3-5 years' experience as a CADD Operator.

CADD Operator, Senior (SIN 541620)

Responsibilities. Performs non-routine and complex assignments from verbal instructions and under minimal supervision; considerable drafting/CADD skills are required to visualize and portray complex design features.

Education and Experience. High school diploma and some advanced education preferred but not required. 5-7 years' experience.

CADD System Operator (SIN 541620)

Responsibilities. Determines design criteria, drawing sequence and presentation, sizing various system components and refining rough sketches and notes to include material quantities and equipment specifications obtained from standard calculations and vendor catalogues. Technical adequacy of non-routine work is reviewed by supervisor during progress and completion.

Education and Experience. High school diploma or equivalent. Two years' experience as a CADD System Operator.

Cartographic Technician (SIN 541620)

Responsibilities. Applies practical knowledge of processes, practices, methods and techniques involved in the construction of new or the revision of existing maps and charts. Performs pre-compilation tasks, assembling aerial photographs into mosaics, drafting, digitizing and editing.

Education and Experience. A bachelor's degree and two years' specialized experience.

Cartographer (SIN 541620)

Responsibilities. Applies professional knowledge and skills in the GIS sciences and relevant mathematics and statistics to plan, design, research, develop, construct, evaluate and modify mapping and charting systems and products such as digital orthophotography, GIS databases, and remote sensing products.

Education and Experience. A bachelor's degree and three years' specialized experience. Must be proficient in the latest GIS-related software.

Chemical Engineer I (SIN 541620)

Responsibilities. Designs and initiates processes for the manufacturing of chemicals and related products such as cement, detergents, gasoline, plastics, and synthetics. Runs experiments and tests to aid in the development of improved manufacturing procedures and processes.

Education and Experience. A bachelor's in Engineering. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not typically require exercising independent judgment. Typically reports to a supervisor or manager. Focus on support for environmental services projects

Chemical Engineer II (SIN 541620)

Responsibilities. Designs and initiates solutions and studies addressing environmental issues and initiatives. Runs experiments and tests to aid in the development of improved procedures and processes.

Education and Experience. A bachelor's in Engineering. Two years' experience in the field or in a related area. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals to perform a variety of tasks. Works under general supervision. A certain degree of creativity and latitude is required.

Chemical Engineer III (SIN 541620)

Responsibilities. Designs and initiates advanced solutions and studies addressing environmental issues and initiatives. Runs experiments and tests to aid in the development of improved procedures and processes.

Education and Experience. A bachelor's in Engineering. Four years' experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May lead and direct the work of others. A wide degree of creativity and latitude is expected. May report to a manager or head of a unit/department.

Civil Engineer I (SIN 541620)

Responsibilities. Performs complex analytical work related to environmental sciences, including water resources engineering and flood hazard mapping in support of client and project objectives. Uses a wide range of principles, theories, concepts, and techniques to develop innovative solutions to problems. Under supervision, prepares flood studies and engineering reviews. Analyzes reports and topographical and geologic data. Prepares or directs preparation and modification of reports. Analyzes coastal and oceanographic processes and the environmental impact of and interactions among waves, currents, sediments, and structures. Assists with collection and analysis of field data. Performs analytical and numerical modeling of waves, currents, and sediment transport in open coast, inlet, and estuarine environments. Performs analysis, visualization, and interpretation of geospatial data, and time-series. May prepare work plans or time estimates and may lead small, select projects.

Education and Experience. A bachelor's in Environmental Engineering or equivalent. Two years' experience on various environmental or engineering related projects including one year specialized experience in floodplain and/or watershed analyses.

Civil Engineer, II (SIN 541620)

Responsibilities. Performs flood and other hazard reviews on hazard mapping products and analyses produced by other entities and prepares associated reports and documentation. May assist in the collection of data and the coordination of activities with other teams and departments. Performs complex analytical work related to water resources engineering and flood hazard mapping in support of client and project objectives. Uses a wide range of principles, theories, concepts, and techniques to develop innovative solutions to problems. Provides expert advice, assistance, or guidance in support of programs and projects. Applies expert knowledge to research, analyze data, and develop conclusions and recommendations.

Education and Experience. A bachelor's of degree in Civil/Environmental Engineering or equivalent. Four years' experience in floodplain and/or watershed mapping analyses. In-depth knowledge of the NFIP and flood mapping program, particularly as related to their history, regulations, and processes.

Civil Engineer III (SIN 541620)

Responsibilities. Analyzes coastal and oceanographic processes and the interactions among waves, currents, sediments, and structures. Assists with collection and analysis of field data. Performs analytical and numerical modeling of waves, currents, and

sediment transport in open coast, inlet, and estuarine environments. Performs analysis, visualization, and interpretation of geospatial data, and time-series. Uses a wide range of principles, theories, concepts, and techniques to develop innovative solutions to problems. Applies expert knowledge to research, analyze data, and develop conclusions and recommendations.

Education and Experience. A bachelor's degree in Civil/Environmental Engineering or Equivalent. Six years' experience in various environmental engineering projects including three years' specialized experience in coastal engineering. M.S. in Coastal Engineering preferred. In-depth knowledge of the NFIP and flood mapping program, particularly as related to history, regulations, and processes

Coastal Engineer I (SIN 541620)

Responsibilities. Analyzes coastal and oceanographic processes and the interactions among waves, currents, sediments, and structures. Assists with collection and analysis of field data. Performs analytical and numerical modeling of waves, currents, and sediment transport in open coast, inlet, and estuarine environments. Performs analysis, visualization, and interpretation of geospatial data, and time-series. Uses a wide range of principles, theories, concepts, and techniques to develop innovative solutions to problems. Applies expert knowledge to research, analyze data, and develop conclusions and recommendations.

Education and Experience. A bachelor's degree in Civil/Environmental Engineering. Two years' experience in various coastal engineering projects including three years' specialized experience in coastal engineering. M.S. in Coastal Engineering preferred. In-depth knowledge of the NFIP and flood mapping program, particularly as related to history, regulations, and processes.

Coastal Engineer II (SIN 541620)

Responsibilities. Analyzes coastal and oceanographic processes and the interactions among waves, currents, sediments, and structures. Assists with collection and advanced analysis of field data. Performs complex analytical and numerical modeling of waves, currents, and sediment transport in open coast, inlet, and estuarine environments. Performs analysis, visualization, and interpretation of geospatial data, and time-series. Uses a wide range of principles, theories, concepts, and techniques to develop innovative solutions to problems. Applies expert knowledge to research, analyze data, and develop conclusions and recommendations.

Education and Experience. A bachelor's degree in Civil/Environmental Engineering. Four years' experience in various coastal engineering projects including five years' specialized experience in coastal engineering. In-depth knowledge of the NFIP and flood mapping program, particularly as related to history, regulations, and processes.

Coastal Engineer III (SIN 541620)

Functional Responsibilities. Manages analytical and numerical modeling of waves, currents, and sediment transport in open coast, inlet, and estuarine environments. Supervise analysis, visualization, and interpretation of geospatial data, and time-series. Uses advance range of principles, theories, concepts, and techniques to develop innovative solutions to problems. Applies expert knowledge to research, analyze data, and develop conclusions and recommendations.

Education and Experience. A bachelor's degree in Civil/Environmental Engineering. A master's degree preferred. Six years' experience in various engineering projects including five years' specialized experience in coastal engineering. In-depth knowledge of the NFIP and flood mapping program, particularly as related to history, regulations, and processes

Computer Specialist I (SIN 541620)

Responsibilities. Operates and monitors computer equipment. Performs routine tasks to maintain computer equipment and their peripherals. Loads peripheral equipment such as tapes and printer paper for operating runs. Observes peripheral equipment and error messages displayed on monitor of terminal to detect faulty output or machine stoppage.

Education and Experience. An associate degree. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May lead and direct the work of others. May report directly to a project lead or manager. A wide degree of creativity and latitude is expected.

Computer Specialist II (SIN 541620)

Responsibilities. Operates and monitors computer equipment. Performs routine tasks to maintain computer equipment and their peripherals. Loads peripheral equipment such as tapes and printer paper for operating runs. Observes peripheral equipment and error messages displayed on monitor of terminal to detect faulty output or machine stoppage.

Education and Experience. A bachelor's degree. Three years' experience in the field or in a related area. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not typically require exercising independent judgment. Typically reports to a project leader or manager.

Computer Specialist III (SIN 541620)

Responsibilities. Operates and monitors computer equipment. Performs routine tasks to maintain computer equipment and their peripherals. Loads peripheral equipment such as tapes and printer paper for operating runs. Observes peripheral equipment and error messages displayed on monitor or terminal to detect faulty output or machine stoppage

Education and Experience. A bachelor's degree. Five years' experience as a computer operator. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May lead and direct the work of others. May report directly to a project lead or manager. A wide degree of creativity and latitude is expected.

Construction Inspector I (SIN 541620)

Responsibilities. Inspects initial construction and additional repairs to ensure adherence to contract specifications, environmental requirements, building ordinances, and zoning laws. May be assigned to residential or commercial structures.

Education and Experience. A bachelor's degree. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job.

Construction Inspector II (SIN 541620)

Responsibilities. Inspects construction and additional repairs to ensure adherence to contract specifications, environmental requirements, building ordinances, and zoning laws. May be assigned to residential or commercial structures.

Education and Experience. Two years' direct experience in the field. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks.

Works under general supervision. A certain degree of creativity and latitude is required.

Construction Inspector III (SIN 541620)

Responsibilities. Inspects and supervise initial construction and additional repairs to ensure adherence to contract specifications, environmental requirements, building ordinances, and zoning laws. May be assigned to residential or commercial structures.

Education and Experience. A bachelor's degree. Two years' direct experience in the field. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision. A certain degree of creativity and latitude is required.

Electrical Engineer I (SIN 541620)

Responsibilities. Designs, tests, installs, and maintains large-scale electronic equipment or machinery for use in manufacturing or power generation or transmission as a part of major environmental initiative or to correct major/mitigate environmental problem. May use computer-assisted engineering and design software and equipment to perform assignments. Applies principles and techniques of electrical engineering to accomplish goals.

Education and Experience. A bachelor's degree in Engineering. Two years' experience in the field or in a related area. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not typically require exercising independent judgment. Typically reports to a supervisor or manager.

Electrical Engineer II (SIN 541620)

Responsibilities. Designs, tests, installs, and maintains large-scale electronic equipment or machinery for use in manufacturing or power generation or transmission as a part of major environmental initiative or to correct major/mitigate environmental problem. May use computer-assisted engineering and design software and equipment to perform assignments. Applies principles and techniques of electrical engineering to accomplish goals.

Education and Experience. A bachelor's degree in Engineering. Four years' experience in the field or in a related area. Familiar with standard concepts, practices, and

procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision; typically reports to a supervisor or manager. A certain degree of creativity and latitude is required.

Electrical Engineer III (SIN 541620)

Responsibilities. Designs, tests, installs, and maintains large-scale electronic equipment or machinery for use in manufacturing or power generation or transmission as a part of major environmental initiative or to correct major/mitigate environmental problem. May use computer-assisted engineering and design software and equipment to perform assignments. Applies principles and techniques of electrical engineering to accomplish goals.

Education and Experience. A bachelor's degree in Engineering. Six years' experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May report to an executive or a manager. A wide degree of creativity and latitude is expected.

Engineer, Soil/Geotechnical II (SIN 541620)

Responsibilities. Civil/Geotechnical Engineer to work on a variety of geotechnical and civil projects in the surface water, industrial, transportation, and energy sectors. Works in teams and independently. Provides technical support on complex geotechnical projects. Analysis and report writing, identifying and defining scope, techniques, and prices for project proposals.

Education and Experience. A bachelor's degree in Engineering. Four years' experience in geotechnical or civil engineering. Managed technical programs and projects, both multiple and individual, with overall program/project responsibilities.

Engineer, Soil/Geotechnical III (SIN 541620)

Responsibilities. Civil/Geotechnical Engineer to work on a variety of geotechnical and civil projects in the surface water, industrial, transportation, and energy sectors. Works in teams and independently. Provides technical support on complex geotechnical projects. Analysis and report writing, identifying and defining scope, techniques, and prices for project proposals. Ensuring consistently accurate and timely client and management communications.

Education and Experience. A bachelor's degree in Engineering. Six years' experience in geotechnical or civil engineering consulting. Directed technical programs and projects, both multiple and individual, with overall program/project responsibilities.

Engineer, Environmental I (SIN 541620)

Responsibilities. Identifies, assesses and resolves problems concerning the environment. May also design, install, operate and maintain measuring apparatus to determine the level of pollutants involving air, land, and water. Performs experiments and reports findings on environmental consequences of equipment, tools, and procedures. Ensures the organization's conformance to federal, state, and local environmental legislation.

Education and Experience. A bachelor's degree in Engineering. Two years' experience in the field or in a related area. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision.

Engineer, Environmental II (SIN 541620)

Responsibilities. Implements and maintains policies adhering to local, state and federal environmental, health and safety regulations. Involved in the design and development of facilities, work areas and work procedures and makes environmental, health and safety recommendations accordingly. Responsible for preparing, maintaining, and updating environmental policy and procedure manuals. Ensures compliance with all environmental, health and safety regulations, and keeps abreast of any changes to laws and regulations that impact the organization.

Education and Experience. A bachelor's degree in Engineering. Four years' experience in the field or in a related area. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. A certain degree of creativity and latitude is required.

Engineer, Environmental III (SIN 541620)

Responsibilities. Implements and maintains company policies adhering to local, state and federal environmental, health and safety regulations. Involved in the design and development of facilities, work areas and work procedures and makes environmental, health and safety recommendations accordingly. Responsible for preparing, maintaining, and updating environmental and policy and procedure manuals. Ensures

compliance with all environmental, health and safety regulations, and keeps abreast of any changes to laws and regulations that impact the organization. Serves as contact with all federal, state, and local regulatory bodies.

Education and Experience. A bachelor's degree in Engineering. Six years' experience in the field or in a related area. Familiar with standard concepts, practices, and procedures within a particular field. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complex tasks. A certain degree of creativity and latitude is required.

Engineer, Environmental Sr (SIN 541620)

Responsibilities. Identifies, assesses and resolves problems concerning the environment. May also design, install, operate and maintain measuring apparatus to determine the level of pollutants involving air, land, and water. Performs experiments and reports findings on environmental consequences of equipment, tools, and procedures. Ensures the organization's conformance to federal, state, and local environmental legislation.

Education and Experience. A bachelor's degree in Engineering. Seven years' experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to a manager or head of a unit/department.

Engineer, Mechanical I (SIN 541620)

Responsibilities. Perform task level engineering duties in planning or assessing mechanical processes, tools and solutions to address environmental concerns or initiatives. Analyze impact and appropriateness of installation, operation, maintenance, and repair of such equipment as centralized heat, gas, water, and steam systems for specific environments. Design, plan, or perform engineering duties in the prevention, control, and remediation of environmental health hazards utilizing various engineering disciplines. Work may include waste treatment, site remediation, or pollution control technology.

Education and Experience. A bachelor's degree and two years' experience in field of expertise.

Engineer, Mechanical II (SIN 541620)

Responsibilities. Perform project level engineering duties in planning or assessing mechanical processes, tools and solutions to address environmental concerns or initiatives. Analyze impact and appropriateness of installation, operation, maintenance, and repair of such equipment as centralized heat, gas, water, and steam systems for specific environments. Design, plan, or perform engineering duties in the prevention, control, and remediation of environmental health hazards utilizing various engineering disciplines. Work may include waste treatment, site remediation, or pollution control technology.

Education and Experience. A bachelor's degree and four years' experience in field of expertise.

Engineer, Mechanical III (SIN 541620)

Responsibilities. Perform project level engineering duties in planning or assessing mechanical processes, tools and solutions to address environmental concerns or initiatives. Analyze impact and appropriateness of installation, operation, maintenance, and repair of such equipment as centralized heat, gas, water, and steam systems for specific environments. Design, plan, or perform engineering duties in the prevention, control, and remediation of environmental health hazards utilizing various engineering disciplines. Work may include waste treatment, site remediation, or pollution control technology

Education and Experience. A bachelor's degree and six years' experience in field of expertise.

Engineer, Sanitary I (SIN 541620)

Responsibilities. Collaborate with environmental scientists, planners, hazardous waste technicians, engineers, and other specialists, and experts in law and business to address environmental problems. Prepare, review, and update environmental investigation and recommendation reports. Design and supervise the development of systems processes for equipment for control, management, or remediation of water, air, or soil quality. Design and supervise the development of systems processes or equipment for control, management, or remediation of water, air, or soil quality. Provide environmental engineering assistance in network analysis, regulatory analysis, and planning or reviewing database development Obtain, update and maintain plans, permits and standard operating procedures.

Advise corporations and Government agencies of procedures to follow in cleaning up contaminated sites to protect people and the environment.

Education and Experience. A bachelor's degree and two years' experience in field of expertise.

Engineer, Sanitary II (SIN 541620)

Responsibilities. Collaborate with environmental scientists, planners, hazardous waste technicians, engineers, and other specialists, and experts in law and business to address environmental problems. Prepare, review, and update environmental investigation and recommendation reports. Design and supervise the development of systems processes for equipment for control, management, or remediation of water, air, or soil quality. Design and supervise the development of systems processes or equipment for control, management, or remediation of water, air, or soil quality. Provide environmental engineering assistance in network analysis, regulatory analysis, and planning or reviewing database development Obtain, update and maintain plans, permits and standard operating procedures. Advise corporations and Government agencies of procedures to follow in cleaning up contaminated sites to protect people and the environment.

Education and Experience. A bachelor's degree and four years' experience in field of expertise.

Engineer, Sanitary III (SIN 541620)

Responsibilities. Collaborate with environmental scientists, planners, hazardous waste technicians, engineers, and other specialists, and experts in law and business to address environmental problems. Prepare, review, and update environmental investigation and recommendation reports. Design and supervise the development of systems processes for equipment for control, management, or remediation of water, air, or soil quality. Design and supervise the development of systems processes or equipment for control, management, or remediation of water, air, or soil quality. Provide environmental engineering assistance in network analysis, regulatory analysis, and planning or reviewing database development Obtain, update and maintain plans, permits and standard operating procedures. Advise corporations and Government agencies of procedures to follow in cleaning up contaminated sites to protect people and the environment.

Minimum Education and Experience. A bachelor's degree and six years' experience in field of expertise.

Engineer, Structural II (SIN 541620)

Responsibilities. Inspect structures using engineering skills to determine structural soundness and compliance with specifications, building codes, and to assess impact on environment and other regulations. Inspections may be general in nature or may be limited to a specific area.

Education and Experience. A bachelor's degree and four years' experience in field of expertise.

Engineer, Structural III (SIN 541620)

Responsibilities. Inspect structures using engineering skills to determine structural soundness and compliance with specifications, building codes, and to assess impact on environment and other regulations. Inspections may be general in nature or may be limited to a specific area.

Education and Experience. A bachelor's degree and six years' experience in field of expertise.

Engineering Technician I (SIN 541620)

Responsibilities. Assists the engineers in the planning of projects. Estimates workload to establish completion dates. Familiar with commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not typically require exercising independent judgment.

Education and Experience. High school diploma and one year experience in the field or a related area.

Engineering Technician II (SIN 541620)

Responsibilities. Assists the engineers in the planning of projects. Estimates workload to establish completion dates. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not typically require exercising independent judgment.

Minimum Education and Experience. High school diploma and two years' experience in

the field or a related area.

Engineering Technician III (SIN 541620)

Responsibilities. Assists the engineers in the planning of projects. Estimates workload to establish completion dates. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not typically require exercising independent judgment.

Education and Experience. High school diploma and four years' experience in the field or a related area.

Environmental Scientist (SIN 541620)

Responsibilities. Conduct research or perform investigation for the purpose of identifying, abating, or eliminating sources of pollutants or hazards that affect either the environment or the health of the population. Utilizing knowledge of various scientific disciplines may collect, synthesize, study, report, and act based on data derived from measurements or observations of air, food, soil, water, and other sources. Collect, synthesize, analyze, manage, and report environmental data, such as pollution emission measurements, atmospheric monitoring measurements, meteorological and mineralogical information, and soil or water samples. Analyze data to determine validity, quality, and scientific significance, and to interpret correlations between human activities and environmental effects. Provide scientific and technical guidance, support, coordination, and oversight to governmental agencies, environmental programs, industry, or the public. Process and review environmental permits, licenses, and related materials. Review and implement environmental technical standards, guidelines, policies, and formal regulations that meet all appropriate requirements. Research sources of pollution to determine their effects on the environment and to develop theories or methods of pollution abatement or control.

Education and Experience. A bachelor's degree and five years' experience in field of expertise.

Environmental Technician (SIN 541620)

Responsibilities. Modify, test, and operate equipment and devices used in the prevention, control, and remediation of environmental pollution, including waste treatment and site remediation. May assist in the development of environmental pollution remediation devices under direction of engineer. Receive, set up, test, and decontaminate equipment. Maintain project logbook records and computer program files. Conduct pollution surveys, collecting and analyzing samples such as air and ground water. Perform environmental quality work in field and office settings. Review technical documents to ensure completeness and conformance to requirements. Perform laboratory work such as logging numerical and visual observations, preparing and packaging samples, recording test results, and performing photo documentation. Review work plans to schedule activities. Inspect facilities to monitor compliance with regulations governing substances such as asbestos, lead, and wastewater. Arrange for the disposal of lead, asbestos and other hazardous materials.

Education and Experience. High school diploma and three years' experience in field of expertise

Estimator I (SIN 541620)

Responsibilities. Prepare cost estimates for projects or services. May specialize according to particular service performed. Consult with clients, vendors, stakeholders, and personnel to discuss and formulate estimates and resolve issues. Analyze plans and other documentation to prepare time, cost, materials, and labor estimates. Prepare estimates used by management for purposes such as planning, organizing, and scheduling work. Confer with project staff and Stakeholders on changes and adjustments to cost estimates. Assess cost effectiveness of products, projects or services, tracking actual costs relative to planned.

Education and Experience. A bachelor's degree and four years' experience in field of expertise.

Estimator II (SIN 541620)

Responsibilities. Prepare cost estimates for projects or services. May specialize according to particular service performed. Consult with clients, vendors, stakeholders, and personnel to discuss and formulate estimates and resolve issues. Analyze plans and other documentation to prepare time, cost, materials, and labor estimates. Prepare estimates used by management for purposes such as planning, organizing, and scheduling work. Confer with project staff and Stakeholders on changes and

adjustments to cost estimates. Assess cost effectiveness of products, projects or services, tracking actual costs relative to planned.

Education and Experience. A bachelor's degree and six years' experience in field of expertise.

Exhibit Dealer (SIN 541620)

Responsibilities. Examine objects to be included in exhibits in order to plan where and how to display them. Acquire, or arrange for acquisition of, specimens or graphics required to complete exhibits. Prepare rough drafts and scale working drawings of sets, including floor plans, scenery, and properties to be constructed. Confer with clients and staff in order to gather information about exhibit space, proposed themes and content, timelines, budgets, materials, and/or promotion requirements. Estimate set- or exhibit-related costs including materials, construction, and rental of props or locations. Develop set designs based on evaluation of scripts, budgets, research information, and available locations. Direct and coordinate construction, erection, or decoration activities in order to ensure that sets or exhibits meet design, budget, and schedule requirements. Inspect installed exhibits for conformance to specifications, and satisfactory operation of special effects components. Plan for location-specific issues such as space limitations, traffic flow patterns, and safety concerns. Submit plans for approval, and adapt plans to serve intended purposes, or to conform to budget or fabrication restrictions.

Education and Experience. A bachelor's degree and three years' experience in field of expertise.

Geologist I (SIN 541620)

Responsibilities. Applies knowledge of geology, chemistry, physics, biology, and mathematics to explain geological phenomena and develop the infrastructure and methodologies to better understand environmental issues and impacts assessment. Applies geological knowledge to explain and describe scientific and engineering problems encountered in NEPA-related studies. Prepares geological reports and maps, interprets and reports research data, and recommends further study or action. Conducts or participate in environmental studies and prepares reports in response to environmental issues.

Education and Experience. A bachelor's degree in Geology with entry level experience working with environmental issues. Familiarity with National Environmental Policy Act (NEPA) requirements.

Geologist II (SIN 541620)

Responsibilities. Applies advanced knowledge of geology, chemistry, physics, biology, and mathematics to explain geological phenomena and develop the infrastructure and methodologies to better understand environmental issues and impacts assessment. Applies geological knowledge to explain and describe scientific and engineering problems encountered in NEPA-related studies. Prepares geological reports and maps, interprets and reports research data, and recommends further study or action. Conducts or participate in environmental studies and prepares reports in response to environmental issues.

Education and Experience. A bachelor's degree in Geology, four years' general experience working with environmental issues and substantive projects. Knowledgeable with National Environmental Policy Act (NEPA) methodologies and assessment techniques. A master's degree may be substituted for the general experience requirement.

Geologist III (SIN 541620)

Responsibilities. Applies advanced knowledge and experience of geology, chemistry, physics, biology, and mathematics to explain geological phenomena and develop the infrastructure and methodologies to better understand environmental issues and impacts assessment. Applies geological knowledge to explain and describe scientific and engineering problems encountered in NEPA-related studies. Directs and supervises the preparation of geological reports and maps, interprets and reports research data, and recommends further study or action. Supervises the development of environmental studies and prepares reports in response to environmental issues.

Education and Experience. A master's degree in Geology with at least six years' general experience working with environmental issues and substantive projects, at least three of which are specialized. Knowledgeable with National Environmental Policy Act (NEPA) methodologies and assessment techniques. A Doctor of Philosophy (PhD) degree may be substituted for three years' the general experience requirement.

GIS Specialist/Remote Sensing (SIN 541620 and 54137GEO)

Responsibilities. Performs high quality data processing tasks including the processing, management, manipulation and archiving of LiDAR and GIS data. Writes reports and generates documents to support the validity of LIDAR and GIS data. Performs a wide variety of the following tasks: reports, statistics, document preparation, data management, data analysis relating. Performs GPS, Inertial and LiDAR processing using provided software. Compiles geospatial data required for multiple-scale map production from scanned aerial and digital photographs. Applies standard photogrammetric techniques to geo-reference three-dimensional image information interpretable from digital photography or other imagery. Uses softcopy photogrammetric workstation technology to classify, measure and record features.

Education and Experience. A bachelor's degree in Geography, Cartography, Engineering, or a related field that encompasses Remote Sensing or Surveying, or five years' specialized experience. Post-secondary training or certification in Geography, Photogrammetry, Cartography, Imagery Analysis, GIS, Survey or Civil Engineering.

GIS Technician/Remote Sensing (SIN 541620 and 541370GEO)

Responsibilities. Applies practical knowledge of processes, practices, methods and techniques involved in the construction of new or the revision of existing maps and charts. Performs pre-compilation tasks, assembling aerial photographs into mosaics, drafting, digitizing and editing. Creates a variety of digital mapping products related to flood hazard mapping using various software platforms and commercial GIS platforms. Perform functions such as digitizing spatial data, type placement, data capture, and cell manipulation, and plotting functions related to Flood Insurance Rate Maps.

Education and Experience. High school diploma or equivalent, three years' general experience, and one year specialized experience.

GIS/Programmer (SIN 541620 and 541370GEO)

Responsibilities. Translates requirements and designs into computer software using commercial GIS or remote sensing technology platforms. Tests, debugs, and refines computer software to produce the required product. Prepares required documentation including both computer software and user level documentation. Enhances software to reduce operating time or improve efficiency. May provide technical direction to other mapping professionals.

Education and Experience. A bachelor's degree in Computer Science, Information

Systems, Software Engineering, Geography, Cartography, GIS, or other discipline related to GIS or Mapping Technology. Two years' general experience, one of which must be specialized. Specialized experience includes experience in the extraction of GIS information and attributing information to client standards and specifications, development within the specific information technology platform identified as the technical solution for the system and extraction of GIS information and attributing information in accordance with client standards and specifications and experience in the development of technical solutions and code for GIS applications.

GPS Analyst (SIN 541620 and 541370GEO)

Responsibilities. Applies professional knowledge and skills in the GIS sciences and relevant mathematics and statistics to plan, design, research, develop, construct, evaluate and modify mapping and charting systems and products such as digital orthophotography, GIS databases, and remote sensing products.

Education and Experience. A bachelor's degree and three years' specialized experience. Must be proficient in current GIS-related software.

Graphic Artist (SIN 541620)

Responsibilities. Designs and creates graphics that meet specific guidelines for commercial and marketing needs for displays, packing, logos, advertising, proposal preparation, or customer needs. Participates in such areas as: the layout and production of print media, publications, web pages, and marketing design efforts.

Education and Experience. A bachelor's degree or post-secondary education and training in art and design accredited by the National Association of Art and Design (NASAD). Three years' general experience creating graphics using computer technology and contributing to business proposals or customer support.

Hydrogeologist (SIN 541620)

Responsibilities. Applies knowledge of geology, chemistry, physics, biology, and mathematics to explain geological phenomena as it pertains to hydrology and hydraulic issues. Maps and charts water flow and disposition of sediment as it applies to geological phenomena and formations. Applies geological knowledge to the evaluation of data in reference to such problems as flooding and forecasting, soil and water conservation programs in NEPA-related studies. Prepares geological/hydrological reports and maps, interprets and reports research data, and recommends further study or action.

Education and Experience. A bachelor's degree in Hydrology or Engineering. General and specific environmental knowledge of geological issues pertaining to water quality assessments and impacts. Five years' general experience with two years' specialized experience.

Hydrologist I (SIN 541620)

Responsibilities. Studies distribution, disposition, and development of waters of land areas, including form and intensity of precipitation, and modes of return to ocean and atmosphere. Performs hydrology and hydraulic engineering analyses. Maps and charts water flow and disposition of sediment. Measures changes in water volume due to evaporation and melting of snow. Studies storm occurrences and determines rate of ground absorption and ultimate disposition of water. Evaluates data obtained in reference to such problems as flood and forecasting, soil and water conservation programs, and planning water supply, waterpower, and flood control.

Education and Experience. A bachelor's degree in Hydrology or Engineering and at least six years' experience writing and editing. General environmental knowledge of water quality assessments and impacts.

Hydrologist II (SIN 541620)

Responsibilities. Studies distribution, disposition, and development of waters of land areas, including form and intensity of precipitation, and modes of return to ocean and atmosphere. Performs hydrology and hydraulic engineering analyses. Maps and charts water flow and disposition of sediment. Measures changes in water volume due to evaporation and melting of snow. Studies storm occurrences and determines rate of ground absorption and ultimate disposition of water. Evaluates data obtained in reference to such problems as flood and forecasting, soil and water conservation programs, and planning water supply, waterpower, and flood control.

Education and Experience. A bachelor's degree in Hydrology or Engineering with four years' general and specialized experience in environmental planning and assessment issues. Familiarity with NEPA as it applies to environmental issues such as wetlands and storm management. A master's degree may be substituted for three years' experience.

Hydrologist III (SIN 541620)

Responsibilities. Studies distribution, disposition, and development of waters of land areas, including form and intensity of precipitation, and modes of return to ocean and atmosphere. Performs hydrology and hydraulic engineering analyses. Maps and charts

water flow and disposition of sediment. Measures changes in water volume due to evaporation and melting of snow. Studies storm occurrences and determines rate of ground absorption and ultimate disposition of water. Evaluates data obtained in reference to such problems as flood and forecasting, soil and water conservation programs, and planning water supply, waterpower, and flood control. Depending on the size of the project and available staff, provide supervisory management and guidance on a project.

Education and Experience. A bachelor's degree in Hydrology or Engineering with six years' general and specialized experience in environmental planning and assessment issues. Knowledgeable with NEPA as it applies to environmental issues such as wetlands and storm management. A master's degree may be substituted for three years' experience.

Landscape Architect I (SIN 541620)

Responsibilities: Knowledgeable in drafting projects that effectively utilize the environment (soil, water, plants) to create to achieve the planned objectives. Experienced in working with other professional disciplines, e.g., architects, engineers, surveyors, environmental scientists, to achieve or conserve natural resources. Experience in using computer technology, Computer-Aided Design (CAD), and geographic information systems (GIS) to model projects. Experience in drafting and producing reports and developing cost estimates that permit planners cost and planning options. Familiarity with environmental issues and trade-offs, and the ability to make assessments in conformance with NEPA.

Education and Experience. A bachelor's degree in Landscape Architecture and appropriate professional certification.

Landscape Architect II (SIN 541620)

Responsibilities: Knowledgeable in drafting projects that effectively utilize the environment (soil, water, plants) to create to achieve the planned objectives. Experienced in working with other professional disciplines, e.g., architects, engineers, surveyors, environmental scientists, to achieve or conserve natural resources. Experience in using computer technology, Computer-Aided Design (CAD), and geographic information systems (GIS) to model projects. Experience in drafting and producing reports and developing cost estimates that permit planners cost and planning options. Familiarity with environmental issues and trade-offs, and the ability to make assessments in conformance with NEPA guidelines.

Education and Experience. A bachelor's degree in Landscape Architecture and appropriate professional certification. Minimum of two years' general experience in landscape architecture design.

Landscape Architect III (SIN 541620)

Responsibilities: Knowledgeable in drafting projects that effectively utilize the environment (soil, water, plants) to create to achieve the planned objectives. Experienced in working with other professional disciplines, e.g., architects, engineers, surveyors, environmental scientists, to achieve or conserve natural resources. Experience in using computer technology, Computer-Aided Design (CAD), and geographic information systems (GIS) to model projects. Experience in drafting and producing reports and developing cost estimates that permit planners cost and planning options. Familiarity with environmental issues and trade-offs, and the ability to make assessments in conformance with NEPA guidelines.

Education and Experience. A bachelor's degree in Landscape Architecture and appropriate professional certification. Minimum of six years' general experience in landscape architecture design, three of which are specialized experience dealing cultural resource management or environmental work.

Photogrammetrist, Certified (SIN 541620)

Responsibilities. Collects, analyzes, and interprets geographic information provided by geodetic surveys, aerial photographs, and satellite data. Researches, studies, and prepares maps and other spatial data in digital or graphic form for legal, social, political, educational, and design purposes. May work with Geographic Information Systems (GIS). May design and evaluate algorithms, data structures, and user interfaces for GIS and mapping systems. Knowledge of principles and methods for describing the features of land, sea, and air masses, including their physical characteristics, locations, interrelationships, and distribution of plant, animal, and human life. Delineates aerial photographic detail, such as control points, hydrography, topography, and cultural features, using precision stereo-plotting apparatus or drafting instruments. Determines guidelines that specify which source material is acceptable for use. Determines map content and layout, as well as production specifications such as scale, size, projection, and colors, and direct production in order to ensure that specifications are followed. Examines and analyzes data from ground surveys, reports, aerial photographs, and satellite images in order to prepare topographic maps, aerial-photograph mosaics, and related charts.

Education and Experience. A bachelor's degree in Civil and Land Surveying, five years' experience in photogrammetry, and professional certification. PLS Registration preferred.

Planner, Environmental I (SIN 541620)

Responsibilities. Experience in environmental planning and analysis, CEQA/NEPA Compliance, demonstrated business development and client interaction experience, public involvement, technical writing, and project management. Works as a team member on a project providing deliverables, monitors schedule and budget, and interfaces with internal Project Managers and clients.

Education and Experience. A bachelor's in Landscape Architecture, Environmental Planning, Environmental Science, Biology or Engineering. Two years' experience in environmental projects. Knowledge of NEPA/CEQA compliance projects. Experience in proposal writing and presentations.

Planner, Environmental II (SIN 541620)

Responsibilities. Experience in environmental planning and analysis, CEQA/NEPA compliance, demonstrated business development and client interaction experience, public involvement, technical writing, and project management. Works as a team member or project lead on a project providing deliverables, monitors schedule and budget, and interfaces and coordinates with internal Project Managers and clients.

Education and Experience. A bachelor's in Landscape Architecture, Environmental Planning, Environmental Science, Biology or Engineering. Four years' experience in environmental projects. Knowledge and experience with NEPA/CEQA compliance projects. Experience in proposal writing and presentations. A master's in an above discipline may be substituted for three years' general experience.

Planner, Environmental III (SIN 541620)

Responsibilities. Experience in environmental planning and analysis, CEQA/NEPA compliance, demonstrated business development and client interaction experience, public involvement, technical writing, and project management. Works as a project lead on a project providing deliverables and ensuring that deliverable schedules are met. Controls schedule and budget, and interfaces and coordinates with internal project managers and clients.

Education and Experience. A bachelor's in Landscape Architecture, Environmental Planning, Environmental Science, Biology or Engineering. Six years' experience in environmental projects with at least three years' as a project lead. Knowledge and experience with NEPA/CEQA compliance projects. Experience in proposal writing and presentations. A master's in an above discipline may be substituted for three years' general experience.

Principal (SIN 541620 and 541370GEO)

Responsibilities. Directs, coordinates, and exercises oversight authority for planning, organizing, controlling, integrating, and completing programs. Supports Project Manager on concept development and system design to support life-cycle program activities. Executes and implements program directives and develops systems and controls to carry out program tasks. Sets priorities and implements procedures for performing work activities. Directs and monitors work results for meeting customer requirements, specifications, and quality assurance standards. Evaluates performance of assigned program tasks in terms of quality, cost control, and program schedules.

Education and Experience. A bachelor's in Environmental Sciences, 15 years' experience in water resources engineering, floodplain or related field. P.E. registration and ASFPM certification desired.

Project Director/QC (SIN 541620 and 541370GEO)

Responsibilities. Coordinates and monitors the scheduling, pricing, and technical performance of programs. Responsibilities also include aiding in the negotiation of contracts, task orders, and contractual changes and coordinating preparations of proposals, plans, specifications, and financial conditions of contracts. Develops new business and expands product line. Ensures adherence to master plans and schedules, develops solutions to program problems, and directs work of incumbents assigned to a program from various departments. Ensures projects are completed on time and within budget. Acts as advisor to program team regarding projects, tasks, and operations. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of complex tasks. A certain degree of creativity and latitude is required.

Education and Experience. A bachelor's degree and at least 12 years' experience in the field or in a related area. Familiar with standard concepts, practices, and procedures within a particular field.

Program Manager (SIN 541620 and 541370GEO)

Responsibilities. Directs, coordinates, and exercises supervisory authority for planning, organizing, controlling, integrating, and completing programs. Develops and establishes procedures and guidelines for daily operation of assigned program. Executes and implements program directives and develops systems and controls to carry out program tasks. Determines work schedules, sets priorities, and implements procedures for performing work activities. Directs and monitors work results for meeting customer requirements, specifications, and quality assurance standards. Evaluates performance of assigned program tasks in terms of quality, cost control, and program schedules.

Minimum Education and Experience. A bachelor's degree or equivalent and 10 years' which at least seven years' must be specialized. Specialized experience in general program management. Specialized experience must be in a technical or functional discipline and must have involved management of multiple programs simultaneously.

Project Manager I (SIN 541620 and 541370GEO)

Responsibilities. Responsible for all aspects of the development and implementation of assigned projects and provides a single point of contact for those projects. Takes projects from original concept through final implementation. Interfaces with all areas affected by the project including end users, stakeholder and client services. Defines project scope and objectives. Develops detailed work plans, schedules, project estimates, resource plans, and status reports. Conducts project meetings and is responsible for project tracking and analysis. Ensures adherence to quality standards and reviews project deliverables. Manages the integration of vendor tasks and tracks and reviews vendor deliverables. Provides technical and analytical guidance to project team. Recommends and takes action to direct the analysis and solutions of problems.

Education and Experience. A bachelor's degree or equivalent and 6 years' specialized experience in general program management. Specialized experience must be in a technical or functional discipline and must have involved management of multiple programs simultaneously.

Project Manager II (SIN 541620 and 541370GEO)

Responsibilities. Responsible for all aspects of the development and implementation of assigned projects and provides a single point of contact for those projects. Takes projects from original concept through final implementation. Interfaces with all areas affected by the project including end users, stakeholder and client services. Defines project scope and objectives. Develops detailed work plans, schedules, project

estimates, resource plans, and status reports. Conducts project meetings and is responsible for project tracking and analysis. Ensures adherence to quality standards and reviews project deliverables. Manages the integration of vendor tasks and tracks and reviews vendor deliverables. Provides technical and analytical guidance to project team. Recommends and takes action to direct the analysis and solutions of problems.

Education and Experience. A bachelor's degree or equivalent and eight years' specialized experience in general program management. Specialized experience must be in a technical or functional discipline and must have involved management of multiple programs simultaneously.

Surveyor I (SIN 541620)

Responsibilities. Surveys and investigates land surfaces to project precise measurement and location of lines, angles, points, areas, and elevations. Performs project research, boundary calculations, and records accuracy of survey data, notes, and sketches. Relies on instructions and pre-established guidelines to perform the functions of the job.

Education and Experience. High school diploma or its equivalent. May have to complete an apprenticeship, and/or formal training in area of specialty. Has knowledge of commonly used concepts, practices, and procedures within a particular field.

Surveyor II (SIN 541620)

Responsibilities. Surveys and investigates land surfaces to project precise measurement and location of lines, angles, points, areas, and elevations. Performs project research, boundary calculations, and records accuracy of survey data, notes, and sketches. Performs a variety of tasks. A certain degree of creativity and latitude is required.

Education and Experience. High school diploma or its equivalent with two years' experience in the field. May have to complete an apprenticeship, and/or formal training in area of specialty. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals.

Surveyor III (SIN 541620)

Responsibilities. Surveys and investigates land surfaces to project precise measurement and location of lines, angles, points, areas, and elevations. Performs

project research, boundary calculations, and records accuracy of survey data, notes, and sketches. Performs a variety of tasks. May lead and direct the work of others. A wide degree of creativity and latitude is expected.

Education and Experience. High school diploma or its equivalent with at least three years' experience in the field. May have to complete an apprenticeship, and/or formal training in area of specialty. Familiar with a variety of the field's concepts, practices, and procedures. Relies on limited experience and judgment to plan and accomplish goals.

Survey Technician (SIN 541620)

Responsibilities. Assists in conducting surveys to ascertain the locations of natural features and man-made structures on the Earth's surface, underground, and underwater using electronic distance-measuring equipment and other surveying instruments.

Education and Experience. High school diploma or its equivalent with two years' experience in the field. May have to complete an apprenticeship, and/or formal training in area of specialty. Familiar with standard concepts, practices, and procedures within a particular field.

Technical Writer (SIN 541620 and 541370GEO)

Responsibilities. Writes a variety of technical articles, reports, brochures, and/or manuals for documentation for a wide range of uses. May be responsible for coordinating the display of graphics and the production of the document.

Education and Experience. A bachelor's degree in a related area and two years' experience in the field or in a related area. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Primary job functions do not typically require exercising independent judgment.

Wetlands Specialist I (SIN 541620)

Responsibilities. Responsible for maintaining and investigating numerous wetland areas, mitigation sites, storm water detention ponds, and natural areas. Assists with collection and analysis of field data involving wetlands and NEPA issues and assessments. Performs analytical studies and develops reports based upon those studies. Uses a wide range of principles, theories, concepts, and techniques to develop innovative solutions to problems and tasks. Applies expert knowledge to research, analyze data, and develop conclusions and recommendations

Education and Experience. A bachelor's degree in Biology, Botany, Environmental Studies, Fisheries, Soil Science, Wildlife, Agriculture or related field. Two years' related work experience; and minimum of one-year experience delineating wetlands and preparing wetland reports and mitigation plans.

Wetlands Specialist II (SIN 541620)

Responsibilities. Responsible for maintaining and investigating numerous wetland areas, mitigation sites, storm water detention ponds, and natural areas. Assists with collection and analysis of field data involving wetlands and NEPA issues and assessments. Performs analytical studies and develops reports based upon those studies. Uses a wide range of principles, theories, concepts, and techniques to develop innovative solutions to problems and tasks. Applies expert knowledge to research, analyze data, and develop conclusions and recommendations

Education and Experience. A bachelor's degree in Biology, Botany, Environmental Studies, Fisheries, Soil Science, Wildlife, Agriculture or related field. Four years' related work experience and minimum of one-year experience delineating wetlands and preparing wetland reports and mitigation plans.

Wetlands Specialist III (SIN 541620)

Responsibilities. Responsible for maintaining and investigating numerous wetland areas, mitigation sites, storm water detention ponds, and natural areas. Assists with collection and analysis of field data involving wetlands and NEPA issues and assessments. Performs analytical studies and develops reports based upon those studies. Uses a wide range of principles, theories, concepts, and techniques to develop innovative solutions to problems and tasks. Applies expert knowledge to research, analyze data, and develop conclusions and recommendations

Education and Experience. A bachelor's degree in Biology, Botany, Environmental

Studies, Fisheries, Soil Science, Wildlife, Agriculture or related field. Six years' related work experience and minimum of one-year experience delineating wetlands and preparing wetland reports and mitigation plans.

Word Processor (SIN 541620 and 541370GEO)

Responsibilities. Checks completed work for spelling, grammar, punctuation, and format. Gathers, registers, and arranges the material to be typed, following instructions. Types correspondence, reports, text and other written material from rough drafts, corrected copies, voice recordings, dictation or previous versions, using a computer, word processor, or typewriter. Files and stores completed documents on computer hard drive or disk, and/or maintains a computer filing system to store, retrieve, update and delete documents. Prints and makes copies of work. Keep records of work performed. Computes and verifies totals on report forms, requisitions, or bills, using an adding machine or calculator. Collates pages of reports and other documents prepared. Electronically sorts and compiles text and numerical data, retrieving, updating, and merging documents as required.

Education and Experience. An associate degree or High school diploma or equivalent with four years' experience, and at least two years' using word processing software.

SIN 541370GEO

GIS Technician/Remote Sensing (SIN 541620 and 541370GEO)

Responsibilities. Applies practical knowledge of processes, practices, methods and techniques involved in the construction of new or the revision of existing maps and charts. Performs pre-compilation tasks, assembling aerial photographs into mosaics, drafting, digitizing and editing. Creates a variety of digital mapping products related to flood hazard mapping using various software platforms and commercial GIS platforms. Perform functions such as digitizing spatial data, type placement, data capture, and cell manipulation, and plotting functions related to Flood Insurance Rate Maps.

Education and Experience. High school diploma or equivalent, three years' general experience, and one year specialized experience.

GIS/Programmer (SIN 541620 and 541370GEO)

Responsibilities. Translates requirements and designs into computer software using commercial GIS or remote sensing technology platforms. Tests, debugs, and refines computer software to produce the required product. Prepares required documentation including both computer software and user level documentation. Enhances software to reduce operating time or improve efficiency. May provide technical direction to other mapping professionals.

Education and Experience. A bachelor's degree in Computer Science, Information Systems, Software Engineering, Geography, Cartography, GIS, or other discipline related to GIS or Mapping Technology. Two years' general experience, one of which must be specialized. Specialized experience includes experience in the extraction of GIS information and attributing information to client standards and specifications, development within the specific information technology platform identified as the technical solution for the system and extraction of GIS information and attributing information in accordance with client standards and specifications and experience in the development of technical solutions and code for GIS applications.

GPS Analyst (SIN 541620 and 541370GEO)

Responsibilities. Applies professional knowledge and skills in the GIS sciences and relevant mathematics and statistics to plan, design, research, develop, construct, evaluate and modify mapping and charting systems and products such as digital orthophotography, GIS databases, and remote sensing products.

Education and Experience. A bachelor's degree and three years' specialized experience. Must be proficient in current GIS-related software.

Principal (SIN 541620 and 541370GEO)

Responsibilities. Directs, coordinates, and exercises oversight authority for planning, organizing, controlling, integrating, and completing programs. Supports Project Manager on concept development and system design to support life-cycle program activities. Executes and implements program directives and develops systems and controls to carry out program tasks. Sets priorities and implements procedures for performing work activities. Directs and monitors work results for meeting customer requirements, specifications, and quality assurance standards. Evaluates performance of assigned program tasks in terms of quality, cost control, and program schedules.

Education and Experience. A bachelor's in Environmental Sciences, 15 years' experience in water resources engineering, floodplain or related field. P.E. registration and ASFPM certification desired.

Project Director/QC (SIN 541620 and 541370GEO)

Responsibilities. Coordinates and monitors the scheduling, pricing, and technical performance of programs. Responsibilities also include aiding in the negotiation of contracts, task orders, and contractual changes and coordinating preparations of proposals, plans, specifications, and financial conditions of contracts. Develops new business and expands product line. Ensures adherence to master plans and schedules, develops solutions to program problems, and directs work of incumbents assigned to a program from various departments. Ensures projects are completed on time and within budget. Acts as advisor to program team regarding projects, tasks, and operations. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of complex tasks. A certain degree of creativity and latitude is required.

Education and Experience. A bachelor's degree and at least 12 years' experience in the field or in a related area. Familiar with standard concepts, practices, and procedures within a particular field.

Program Manager (SIN 541620 and 541370GEO)

Responsibilities. Directs, coordinates, and exercises supervisory authority for planning, organizing, controlling, integrating, and completing programs. Develops and establishes procedures and guidelines for daily operation of assigned program. Executes and implements program directives and develops systems and controls to carry out

program tasks. Determines work schedules, sets priorities, and implements procedures for performing work activities. Directs and monitors work results for meeting customer requirements, specifications, and quality assurance standards. Evaluates performance of assigned program tasks in terms of quality, cost control, and program schedules.

Minimum Education and Experience. A bachelor's degree or equivalent and 10 years' which at least seven years' must be specialized. Specialized experience in general program management. Specialized experience must be in a technical or functional discipline and must have involved management of multiple programs simultaneously.

Project Manager I (SIN 541620 and 541370GEO)

Responsibilities. Responsible for all aspects of the development and implementation of assigned projects and provides a single point of contact for those projects. Takes projects from original concept through final implementation. Interfaces with all areas affected by the project including end users, stakeholder and client services. Defines project scope and objectives. Develops detailed work plans, schedules, project estimates, resource plans, and status reports. Conducts project meetings and is responsible for project tracking and analysis. Ensures adherence to quality standards and reviews project deliverables. Manages the integration of vendor tasks and tracks and reviews vendor deliverables. Provides technical and analytical guidance to project team. Recommends and takes action to direct the analysis and solutions of problems.

Education and Experience. A bachelor's degree or equivalent and 6 years' specialized experience in general program management. Specialized experience must be in a technical or functional discipline and must have involved management of multiple programs simultaneously.

Project Manager II (SIN 541620 and 541370GEO)

Responsibilities. Responsible for all aspects of the development and implementation of assigned projects and provides a single point of contact for those projects. Takes projects from original concept through final implementation. Interfaces with all areas affected by the project including end users, stakeholder and client services. Defines project scope and objectives. Develops detailed work plans, schedules, project estimates, resource plans, and status reports. Conducts project meetings and is responsible for project tracking and analysis. Ensures adherence to quality standards and reviews project deliverables. Manages the integration of vendor tasks and tracks and reviews vendor deliverables. Provides technical and analytical guidance to project team. Recommends and takes action to direct the analysis and solutions of problems.

Education and Experience. A bachelor's degree or equivalent and eight years' specialized experience in general program management. Specialized experience must be in a technical or functional discipline and must have involved management of multiple programs simultaneously.

Technical Writer (SIN 541620 and 541370GEO)

Responsibilities. Writes a variety of technical articles, reports, brochures, and/or manuals for documentation for a wide range of uses. May be responsible for coordinating the display of graphics and the production of the document.

Education and Experience. A bachelor's degree in a related area and two years' experience in the field or in a related area. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Primary job functions do not typically require exercising independent judgment.

Word Processor (SIN 541620 and 541370GEO)

Responsibilities. Checks completed work for spelling, grammar, punctuation, and format. Gathers, registers, and arranges the material to be typed, following instructions. Types correspondence, reports, text and other written material from rough drafts, corrected copies, voice recordings, dictation or previous versions, using a computer, word processor, or typewriter. Files and stores completed documents on computer hard drive or disk, and/or maintains a computer filing system to store, retrieve, update and delete documents. Prints and makes copies of work. Keep records of work performed. Computes and verifies totals on report forms, requisitions, or bills, using an adding machine or calculator. Collates pages of reports and other documents prepared. Electronically sorts and compiles text and numerical data, retrieving, updating, and merging documents as required.

Education and Experience. An associate degree or High school diploma or equivalent with four years' experience, and at least two years' using word processing software.

SIN 541370GIS

UAS Pilot

Responsibilities. Responsible for piloting high end drone systems used for aerial inspections of transmission line structures, among other applications and assist with field work tasks associated with UAS flights and/or compliance inspections.

Education and Experience. High School Diploma or GED and 5 years of experience. FAA Commercial Multi-Engine Certified Pilot or Licensed FAA Remote Pilot. Have or be able to obtain a FAA Class II medical certificate.

Aerial Pilot

Responsibilities. Execute all assigned preflight, flight and post flight duties as required to safely and effectively operate the assigned sensor and mission set. This includes, mission planning, pre-briefings, mission system inspection, operation troubleshooting, post-flight inspections, debriefings and mission documentation.

Education and Experience. High School Diploma or GED. FAA Commercial Multi-Engine Certified Pilot or Licensed FAA Remote Pilot. Have or be able to obtain a FAA Class II medical certificate. Minimum of 700 hours as Pilot-in-Command (PIC) in type for high performance, multi-engine aircraft.

Aerial Sensor Operator

Responsibilities. Performs data acquisition and mapping tasks while flying over designated areas. Execute all assigned preflight, flight and post flight duties as required to safely and effectively operate the assigned sensor and mission set. This includes, mission planning, pre-briefings, mission system inspection, operation troubleshooting, post-flight inspections, debriefings and mission documentation. The ASO may also assist with performing sensor upgrades and maintenance. Provide multi-source data collection supporting real-time operations and post-mission analysis. The individual will be responsible for collecting and analyzing information while safely and effectively functioning as an aircrew member on a multi-position aircraft.

Education and Experience. Bachelor's degree and 2 years of prior relevant experience. Have or be able to obtain a FAA Class II medical certificate. Must show

demonstrable interpretation and analysis experience with E/O IR sensor systems.

Computer Programmer (SIN 541370GIS)

Responsibilities. Create, modify, and test the code, forms, and script that allow computer applications to run. Work from specifications drawn up by software developers or other individuals. May assist software developers by analyzing user needs and designing software solutions. May develop and write computer programs to store, locate, and retrieve specific documents, data, and information.

Education and Experience. A bachelor's degree in computer science, engineering, IT or related field and five years' experience.

Data Scientist II (SIN 541370GIS)

Responsibilities. Utilize data mining and analysis skillsets to enhance collections of data for the purposes of complex data analysis. Process, cleanse and verify the integrity of data used for analysis and provide recommendations on additional datasets that could be utilized or created in support of analysis. Uses a wide range of data analysis and management techniques to develop innovative analysis and visuals in support of the project goals and objectives. Provides expert advice, assistance or guidance in support of data analytics.

Education and Experience. A bachelor's degree in related field and five years' experience.

GIS Technician Senior (SIN 541370GIS)

Responsibilities. Responsible for making maps, customized Geographic Information Systems (GIS) applications and manipulating data to serve a variety of purposes. Read and interpret maps, manipulate and understand digital land data and manage data entered into a GIS database. Advanced computer programming and data analysis skills, knowledge of modern cartographic standards and principles and advanced statistical, mathematical, and methodology skills. Proficiency in design software including AutoCAD and ArcView.

Education and Experience. A bachelor's degree in GIS, Geography or related field, a GISP, CP or other professional certification in field, and 6-8 years' experience.

Lidar Specialist

Responsibilities. Performs high quality data processing tasks including the

processing, management, manipulation and archiving of LiDAR and GIS data. Writes reports and generates documents to support the validity of LIDAR and GIS data. Performs a wide variety of the following tasks: reports, statistics, document preparation, data management, data analysis relating. Performs GPS, Inertial and LiDAR processing using provided software. Compiles geospatial data required for multiple-scale map production from scanned aerial and digital photographs. Applies standard photogrammetric techniques to geo-reference three-dimensional image information interpretable from digital photography or other imagery. Uses softcopy photogrammetric workstation technology to classify, measure and record features.

Minimum Education and Experience. Bachelor's degree in geography, cartography, engineering, or a related field that encompasses remote sensing or surveying and 0-5 years of specialized experience. Post-secondary training or certification in geography, photogrammetry, cartography, imagery analysis, GIS, survey, or civil engineering.

Lidar Specialist Senior

Responsibilities. Performs high quality data processing tasks including the processing, management, manipulation and archiving of LiDAR and GIS data. Writes reports and generates documents to support the validity of LIDAR and GIS data. Performs a wide variety of the following tasks: reports, statistics, document preparation, data management, data analysis relating. Performs GPS, Inertial and LiDAR processing using provided software. Applies lidargrammetry tools and workflows to complete projects and produce spatial datasets. Provides training an oversight of other Lidar specialists and analysts.

Education and Experience. Bachelor's degree in geography, cartography, engineering, or a related field that encompasses remote sensing or surveying and 8 years of specialized experience. Post-secondary training or certification in geography, photogrammetry, cartography, imagery analysis, GIS, survey, or civil engineering. Must have at least one year of supervisory experience.

Photogrammetrist Senior (SIN 541370GIS)

Responsibilities. Collects, analyzes, and interprets geographic information provided by geodetic surveys, aerial photographs, and satellite data. Researches, studies, and prepares maps and other spatial data in digital or graphic form for legal, social, political, educational, and design purposes. May

work with Geographic Information Systems (GIS). May design and evaluate algorithms, data structures, and user interfaces for GIS and mapping systems. Knowledge of principles and methods for describing the features of land, sea, and air masses, including their physical characteristics, locations, interrelationships, and distribution of plant, animal, and human life. Delineates aerial photographic detail, such as control points, hydrography, topography, and cultural features, using precision stereo-plotting apparatus or drafting instruments. Determines guidelines that specify which source material is acceptable for use. Determines map content and layout, as well as production specifications such as scale, size, projection, and colors, and direct production in order to ensure that specifications are followed. Examines and analyzes data from ground surveys, reports, aerial photographs, and satellite images in order to prepare topographic maps, aerial-photograph mosaics, and related charts.

Education and Experience. Bachelor's degree in civil and land surveying or a relevant field and 5 years' experience in photogrammetry. CP, GISP Registration.

Quality Manager (SIN 541370GIS)

Responsibilities. Responsible for all aspects of quality assurance and compliance with applicable regulatory requirements; conducts audits and reviews/analyzes data and documentation. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Will very likely lead and direct the work of others. A wide degree of creativity and latitude is expected. Reports to a manager or head of a unit/department.

Education and Experience. A bachelor's degree in Geospatial or Mapping or equivalent field and eight years' experience.

Remote Sensing Supervisor (SIN 541370GIS)

Responsibilities. Performs high quality data processing tasks including the processing, management, manipulation and archiving of LiDAR and GIS data. Writes reports and generates documents to support the validity of LiDAR and GIS data. Performs a wide variety of the following tasks: reports, statistics, document preparation, data management, data analysis relating. Performs GPS, Inertial and LiDAR processing using provided software. Compiles geospatial data

required for multiple-scale map production from scanned aerial and digital photographs. Applies standard photogrammetric techniques to geo-reference three-dimensional image information interpretable from digital photography or other imagery. Uses softcopy photogrammetric workstation technology to classify, measure and record features.

Education and Experience. Bachelor's degree in geography, cartography, engineering, or a related field that encompasses remote sensing or surveying and 8 years of experience.
